

ADJUSTABLE BONNET/BOOT ANTENNA MOUNT

BK-900

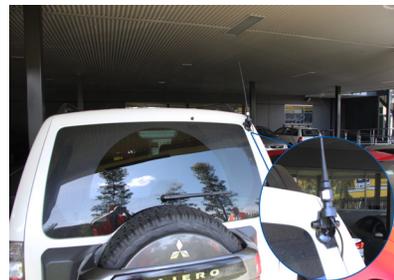

The BK-900 can be mounted in a variety of locations due to its double articulation. It can be mounted on boot/bonnet lids or attached to almost any lip on a vehicle: vertical, horizontal or anywhere in between. The BK-900 will fit over an edge no more than 6mm thick and can be adjust in several planes so the antenna can be made vertical.

Features:

- No holes to drill
- Stainless steel & alloy construction
- Robust low-profile matt-black design
- Suitable for most vehicles
- Fits most mobile antennas
