2 x cables

1 x down strut

1 x up strut

GRUNT

INSTALLATION INSTRUCTIONS ISUZU DMAX SLOW DOWN EASY UP STRUTS PART NUMBER: GUDS-DMAX21

Fitting to slow down strut

- 1: On the **DRIVERS SIDE** Remove the bolt nearest to the body
- 2: Place the bracket as shown and replace the bolt and tighten

3: Remove the bolt that holds the strap

4: Replace with the pre assembled strut provided making sure the cable is replaced first

NOTES: ENSURE THE FACTORY WASHER IS REPLACED BETWEEN THE CABLE AND THE BODY
Duplicate the procedure on the passenger side for the easy lift strut

5: Once the lift strut is installed let the tailgate down and remove the wood spacer
